

Is your sign sending the right message?

It's the first thing your customers see. And it's the last thing you should worry about.

By using the GE Tetra LED Channel Lighting system in your signage, your message comes shining through—the way it should. Tetra's rugged, flexible and incredibly reliable design is virtually maintenance free.

Imagine that. No more broken tubes, burnt-out neon or cold-weather concerns. Your outdoor signage will look the same for your fifth anniversary as it did for your grand opening. We guarantee it.

No more burnouts.

GE Tetra LED Channel Lighting from GELcore. A brilliant idea that keeps your name in lights. For more information, visit our website at www.gelcore.com or email us at tetra@gelcore.com.
